The seat belt's leg loops can be resized to fit comfortably on the hip bones, distributing the impact over the entire pelvis, and rappelling like a comfortable seat.

It is made of synthetic materials and has no toxic effects on the human body

Which venues are better to open a children's playground?

1. Comprehensive business district:

The best location is undoubtedly in major shopping malls or large-scale comprehensive commercial districts, where there is a large flow of people and many potential customers, and comprehensive shopping malls, shopping malls, CBD, shopping malls and shopping malls have Restaurants, cinemas, leisure areas, which in itself is an advantage to attract customers.

The shopping mall has obvious divisions. Generally, there is a whole floor dedicated to children-related goods, such as children's clothing, children's restaurants, toy stores, etc. Opening a children's playground here is equivalent to directly acquiring intended customers or Potential customer group.

The area of a large shopping mall is generally more than 300 square meters, and the rent of the venue is relatively expensive. A good location is also unavailable. It is more suitable for a large and medium-sized children's playground with a sufficient budget.

2. Independent store:

Independent stores are what we call frontage shops. The advantage of independent stores is that they receive fewer restrictions and are conducive to expanding operations. However, independent stores require merchants to attract traffic, so they need some marketing methods that are more attractive to consumers. Choose independent stores. At that time, the best location is the focus area of children's shops.

3. Surrounding residential areas:

Whether it is a large-scale community, a development high-rise community, or a high-end community nearby, it is a good choice. Because the population density around the community is high and the passenger flow is relatively stable, the frequency of parents taking children to visit will be higher, and business will be easier to do. A large number of fixed target groups gathered near large communities.

If you do a good job of safety inspections and improve service standards, and improve your reputation, it is easy for customers to apply for membership cards and quickly pay back. There will basically be children's related industries near high-end communities, and outdoor playgrounds are also indispensable items.

Near the developmental high-rise community, it is generally necessary to move in after a part of the population, and there are enough children to choose. Such a place has room for development, and the flow of people after all moves in is quite large. The surrounding community is more suitable to open a 100-200 square meter. The small indoor children's playground is more suitable for entrepreneurs with limited budgets.

4. Near kindergartens and primary schools:

In these places, a certain degree of popularity can be guaranteed, and the target group is relatively clear. It is also a very good choice to find venues around the kindergarten.

5. Large square or park:

Many cities have residential squares or parks. These places are one of the main venues for citizens. The flow of people is large but scattered. To open a children's playground nearby needs to be enough to attract consumers, and the price cannot be too high.

6. Suburban scenic spots rest area::

Whenever a holiday is, it is a good time for a family to travel by car to the surrounding scenic spots. Tourist attractions usually have several rest areas. If children's playgrounds are set up in these places, it is also a good choice to change the rest areas into theme children's playgrounds. In addition to some areas for children, they also provide special catering, rest areas and themed product consumption areas. This combination of diversification will also be more popular.

Summary: There are many factors that need to be considered in the selection of children's playground. In addition to the points introduced above, relevant market research must be done in the early stage to check whether there is already a children's playground within a few kilometers of the nearby area, and what is the size of the area. , How is the business situation, investigating the prosperous degree of the location of the store, such as the surrounding business status, business environment, etc., the flow of people, the level of consumption, and the sufficient market research analysis can be beneficial to the later operation of the children's playground.

Suggestions for indoor playground Franchise

1. What's venue good for kids indoor playground?

The venue of the children's playground must be chosen where people gather in commercial centers, CBD, shopping malls, shopping centers, large supermarkets, communities, kindergartens, schools, square park scenic spots, etc. with large flow of people, good transportation, many target potential customers, and strong consumption ability. The location, and the closer to the target customer, the more suitable the venue.

2. Venue height and shape:

How much height is suit for children indoor playground? What's shape good for venue? The clear height of the site (the distance from the lowest part of the roof to the ground) is preferably above 2.8 meters, and the higher the better. At the same time, there should be as few columns as possible in the use area of the site, and the shape of the site should be as regular as possible, so that the utilization rate of the site can be high.

3. Floor: which floor is good for kids indoor play area?

The selected floor location should be on the 1st to 3rd floors. The negative and 4th floors are not allowed to be children's playgrounds due to fire protection problems. Otherwise, it may be difficult to pass when opening a store to apply for a fire protection permit. This needs to be paid attention to.

4. Less competitive area

When selecting a site, you must have an understanding of the basic situation of the surrounding children's playground, which is conducive to comprehensive consideration. If the surrounding children's park market is already saturated, it needs to be carefully considered. Even if the demand is great, the pressure of competition is rather strong, which is not conducive to the operation of the kids indoor playground. Therefore, you must do a good job in the relevant market before choosing a site. Investigation and analysis.

Tips for playing in Naughty Castle

1. The naughty castle facilities are for children aged 2-14. All admission is required, one ticket per person.
2. It is forbidden for children under 3 years old to enter the venue alone, please parents do their duty of guardianship.
3. Before entering the venue, everyone must take off their shoes and wear socks, and children are not allowed to wear open pants to enter the venue.
4. Do not bring sharp objects into the facility to avoid scratching the child's body during the game.
5. When playing in the ball pool, please expose your head to the surface of the ball, and do not throw or throw the ball out of the ball area.
6. Do not pull the coconut tree forcefully, so as not to hurt the children by rotating too fast.
7. Do not jump directly from the height of the facility to avoid falling and hurting other children.
8. Children should not turn their heads down when playing trampoline to avoid accidents.
9. Do not throw the ball outside the area or hit people with the ball when playing in the screen ball pool.
10. Please do not bring drinks or food into the venue, and it is forbidden to eat or drink in the facility area.
11. The fence of the facility is only for protection, it is forbidden to climb and pull strongly.
12. Children are not allowed to enter the venue when they are sick or disabled.
13. It is strictly forbidden to urinate or spit in the facility. In case of child vomiting or emergencies, please contact the staff in time for proper treatment.
14. For safety reasons, the on-site facilities that violate the above regulations and cause injuries to themselves or others will be borne by the person responsible. The site is not responsible for accidents caused by the quality of the facilities.
15. Please take good care of your personal belongings.

Safety Precautions

1. Tell customers the correct way to play, to line up in order, and not to push others when playing, and not to make trouble. Do not run around on the playground, do dangerous actions, such as sliding your feet downwards when sliding on a slide, do not fall onto the slide from the railing outside, do not stand on a swing, etc.
2. Remind customers to be aware of avoiding mobile entertainment facilities and avoid collisions from other customers. When you see other people playing swings and other equipment with large swings, stay away.
3. Tell customers that they must wait for the moving amusement facilities to stop before going up and down. Don't jump down from the rotating swivel chair. Before going down, be sure to see that there are no other treasures or objects in the middle of the road. When jumping, keep your feet on the ground and bend your knees slightly.
4. Don't let the baby hold the hand that has played with the toy in the mouth, nor can it hold the toy. If other babies or adults have sneezing, coughing and other symptoms, try to take them away. Pay attention to the material description of playground equipment. Wood treated with arsenic and paint containing lead are huge safety hazards. Remember, wash your baby's hands immediately after playing.
5. If the playground equipment is wet, tell your baby not to play, because the wet surface will make these equipment very slippery.
6. When playing in the venue, do not wear clothes with a string or a belt tether. Strings, backpack straps, and necklaces may be accidentally hung on the equipment, causing danger.

Warm-up reminder

Stretching exercises:

Stretching exercise can reduce the chance of strain caused by strenuous exercise and relieve muscle soreness. Stretching exercises are also conducive to shaping a good posture.

Fixed point bend:

During the completion process, pay attention to keeping your body balanced, exert your abdomen force, try to be as straight as possible, effectively stretch your own muscles, and avoid injury during subsequent exercises.

Ankle activities:

The stability of the ankle joint includes static stable structures (ligaments) and dynamic stable structures (muscles). It is also related to joint balance functions, nerve reflexes and other factors.

Shoulder activities:

The shoulder joint is at a very important core position. Its stability and flexibility determine all your training, so shoulder joint activity before exercise is very important.

Warm up effectively to increase muscle temperature and body temperature to ensure exercise safety

Naughty Castle FAQ

1. What are the styles of indoor playground?

We have such themes as classic, macaroon, candy, ocean, forest, space and pirate ship, etc. We can also customized the style as per your requirements

2. How about the budget for starting indoor playground business?

According to different location size and designs. We provide different indoor playground which its cost is ranging from \$20000 to \$600000. At the same time, our team will customize the appropriate design for you according to your budget.

3. Do you offer free designs?

Yes, of course. If you have a place, please kindly provide us photo and CAD. Our design team will design the most suitable blueprint for you according to the shape of your site.

4. What is the age range for indoor playground?

In order to meet the needs of kids in the different age range, and consider the safety, generally indoor playground should be divided into two areas: one is the toddler area which is suitable for 0-3 years old kids, and other is the main function area which is suitable for 3-15 years old kids.

5. How long is the delivery time?

The production time will depend on the size of the site and the order of our factory. Generally speaking, we start production after receiving your 30% deposit. In the process of production, we will take videos of you during production. After production, we will also provide you with photos and videos when we install the cabinet.

6. What about the installation? Do you provide installation?

There are two ways to install. First, if you want to install by yourself, we will provide video and structure diagram. Second, if you need us to install it, we have professional team to do it, but you have to pay him the labor cost, including food, accommodation, and round-trip air tickets. In general, this situation is when the venue is relatively large, otherwise the small venue is not cost-effective.

7. How do you pack your products?

It is installed in strict accordance with the export standards. It will be wrapped with black cotton inside and then wrapped with professional fresh-keeping film outside.

8. Is there any CE certification?

9. Do we need regular maintenance?

Generally, it depends on your frequency of use, what needs to be done is to clean and check regularly. Also, we will provide later maintenance manual. Maintenance: Everyone should take off his shoes when entering the indoor playground; the EVA mat must be avoided to step by shoes with high heels.

10. Have you worked with any company in our region?

We keep our customers confidential for commercial purposes.

11. What is the payment term?

T/T, L/C, Western Union, etc, our normal payment term is 50% as deposit.
